

Request for Electricity

Application for Electrical Power Supply

Both of Space-only booth and Shell Scheme Package Booth does not include Electric Power Supply or Lighting Items.

Please submit **Form 6** to Murayama Inc. no later than Friday, August 18, to order the power supply and lighting items.

※ Floor Plan with a clear indication of the primary power box location is necessary.

※ Exhibitors who wish a 24-hour supply of electricity should notify in the form.

● Power Supply Fee:

- Primary power line installation fee : 13,000 yen per kilowatt. (Excl. tax)
- Electric consumption fee : 5,000 yen per kilowatt. (Excl. tax)

● Power Ratings :

- 100 V 50 Hz single-phase AC with double core wire
- 200 V 50 Hz single phase AC with double core wire
- 200 V 50 Hz three-phase AC with triple core wire

Note that no special voltages are available other than above.

- Electric Power Supply: 12:00PM on Sunday, October 15, ~17:00PM on Wednesday, October 18.
- Exhibitors are requested to turn off all lights and electrical devices in their booth when leaving the hall.

Request for Electric Item Installments.

- Requests for secondary electrical work, such as installing outlets, spotlights etc., should be made to Murayama Inc., by submitting the **Form. 6** no later than Friday, August 18.
- Wiring panels and point-contact switches should be installed in approved steel or plastic boxes at locations where they can be easily accessed and inspected.

Remarks for Electrical Work

- Electrical work in the booth should be completed before 06:00AM on October 16.
- Electrical devices should have labels or markings that certify approval from the Ministry of Economy, Trade and Industry.
- Fluorescent or high-efficiency mercury-vapor lamps (condenser type) should be used in the booth.
- Circuit breakers installed in the booth should be the short circuit (leak) activation type.
- Only approved electrical cables should be used in the booth.
- Devices which may generate heat, such as incandescent lights, resistors etc., should be installed at locations where they do not raise the temperature of adjacent heat-generating devices.
